

**A2**

**1º Bimestre**

Matéria: **Inglês**

**8º ano** \_\_\_\_

Professor(a): Bianca C. Rodrigues

Data:

Valor: 8,0

Nota:

Aluno(a):

Assinatura do responsável:

“E que hoje nasceu o Salvador, que é Cristo, o Senhor” (Lucas 2:11)

**INSTRUÇÕES**

- *Leia com atenção as questões antes de responder.*
- *É proibido o uso de corretivo.*
- *Coloque seu nome completo. Prova sem nome não será corrigida.*
- *A prova deve ser feita à caneta azul ou preta.*
- *A leitura e interpretação das questões fazem parte da sua avaliação.*
- *Escreva corretamente com ordem, capricho e letra legível.*

**1. WRITE THE CORRECT PLACE ACCORDING TO OUR CLASSES. (2,0)**

- a. A \_\_\_\_\_ is a waterless, desolate area of land with little or no vegetation, typically one covered with sand.
- b. A \_\_\_\_\_ is a natural underground chamber in a hillside or cliff.
- c. A \_\_\_\_\_ is a slowly moving mass or river of ice formed by the accumulation and compaction of snow on mountains or near the poles.
- d. A \_\_\_\_\_ is a cascade of water falling from a height, formed when a river or stream flows over a precipice or steep incline.
- e. A \_\_\_\_\_ is a large natural elevation of the earth's surface rising abruptly from the surrounding level; a large steep hill.
- f. A \_\_\_\_\_ is a large area of water surrounded by land.
- g. A \_\_\_\_\_ is a pebbly or sandy shore, especially by the sea between high- and low-water marks.
- h. An \_\_\_\_\_ is a very large expanse of sea, in particular each of the main areas into which the sea is divided geographically.
- i. A \_\_\_\_\_ is a large area covered chiefly with trees and undergrowth.
- j. A \_\_\_\_\_ is a large natural stream of water flowing in a channel to the sea, a lake, or another river.

**2. ANSWER THE QUESTIONS USING TOO OR NOT... ENOUGH. (1,6)**

a. What subjects in school are too difficult for you?

\_\_\_\_\_

b. What kinds of sports are too exciting for you?

\_\_\_\_\_

c. Are fantasy books too imaginative or not imaginative enough for you?

\_\_\_\_\_

d. What subjects in school are not difficult enough?

\_\_\_\_\_

### 3. READ THE TEXT AND CIRCLE (T) TRUE OR (F) FALSE. (1,4)

## THE MOST MYSTERIOUS PLACES AROUND THE WORLD

By Hristina Byrnes Published August 02, 2016

Planet Earth is a mysterious place that never ceases to amaze.

You won't have to look far to find some natural peculiarity [...]. However, many places are complete enigma. [...]

Some places captivate people more than others. Take the Eternal Flame Falls in New York, the Bermuda Triangle or the Nazca Lines, one of archaeology's greatest puzzles, for example. [...]

### Eternal Flame Falls, Orchard Park, New York

If you go to the waterfalls of Shale Creek in the southeast corner of Chestnut Ridge Park, you may notice a strange orange-red light behind the water and think it's just your eyes playing tricks on you.

Can something really burn under water? You'll actually smell the golden flame because it's fired by methane gas escaping through the cracks.

The water sometimes extinguishes the flame, but you can easily start it up again with a lighter.

### The Bermuda Triangle

The Bermuda Triangle – also known as the Devil's Triangle – is perhaps the most famous spot of mystery in the world. It covers an area about 500,000 square miles between Bermuda (once known as the Isle of Devils), Miami and San Juan in Puerto Rico.

Ships passing and planes flying over the Triangle are said to have vanished in thin air or sunk in the deep sea without any explanation. Many hypotheses have been offered over the years as to what's happening – some are geological or hydrological. Very scientific.

### Nazca Lines, Peru

The lines, located in the arid Peruvian coastal plain, were scratched on the surface of the ground between 500 B.C. and A.D. 500, are among archaeology's greatest enigmas because of their quantity, nature, size and continuity, according to UNESCO. "The geoglyphs depict living creatures, stylized plants and imaginary beings, as well as geometric figures several miles long. They are believed to have had ritual astronomical functions."
